# Comprehensive management of unilateral vocal fold paralysis

---

**8, 9 and 10 May 2019**  
**Leiden University Medical Center**  
**the Netherlands**

## Save the date

Unilateral vocal fold paralysis (UVFP) is one of the common problems in laryngology. Practitioners treating these patients are faced with a choice of surgical techniques for rehabilitation. This course offers an in-depth learning experience into the management of vocal fold immobility.

This full three-day international course includes:

- Overview of work-up and non-surgical treatment for UVFP
- Full coverage of office and operating theatre based treatments by leaders in this field
- Extensive cadaveric dissection (one larynx and full neck per person)
- Case discussions

Faculty: Gauthier Desuter (B), Fred Dijkers (NL), Ramon Franco (USA), Kate Heathcote (UK), Markus Hess (D), Ton Langeveld (NL), Hans Mahieu (NL), Jean-Paul Marie (F), Youri Marijn (B), Elisabeth Sjogren (NL)

---

## Intended audience

ENT specialists

---

## Accreditation

Will be requested with the Dutch ENT association (Nederlandse Vereniging voor Keel-Neus-Oorheelkunde).

---

### Important

Please bare in mind that you need to book your hotel nights far in advance. This course will be held during a busy tourist season (bulb flower season). More information and possible hotels can be find on our website.
